

Valogix Announces Its Participation in SAP® EcoHub Solution Marketplace

SAP EcoHub Delivers Added Value to Customers by Accelerating Discovery, Evaluation and Purchase of Trusted Partner Solutions – Such as Valogix Planner – That Complement SAP Offerings

Saratoga Springs, NY – January 31, 2012 – Valogix LLC, a leader in advanced inventory planning and optimization solutions for small and mid-sized businesses, today announced its participation in the SAP® EcoHub solution marketplace. This community-powered online marketplace makes it easier for customers to discover, evaluate and purchase partner solutions – such as Valogix Planner – that complement SAP applications.

SAP EcoHub provides customers access to complementary solutions and offerings that work best for their installation of SAP solutions. It leverages SAP's comprehensive ecosystem, where customers and partners can connect. SAP EcoHub integrates community input, user feedback, ratings and partner demos, enabling a more educated and intelligent selection of solutions.

Valogix is listed on the SAP EcoHub site at <http://ecohub.sap.com/catalog/#!/solution:Valogix-Inventory-Planner>. Resources available for download include a Valogix summary, an informational white paper and several customer success stories. Also provided are certification details for Valogix Planner 6 and the ability **to request a live demo** or contact from Valogix.

“By participating in SAP EcoHub, we are able to extend the reach of our solutions to even more potential customers within the SAP ecosystem,” said Richard F. Vaccaro, Chief Executive Officer for Valogix. “SAP EcoHub offers an innovative way for the SAP community to come together, offering solid value to customers and partners. It demonstrates SAP’s true thought leadership.”

As an SAP software solution and technology partner and established independent software vendor offering solutions in support of SAP offerings, Valogix has made serving the needs of customers using SAP solutions a top priority. Most recently, Valogix Planner 6 achieved SAP-certified integration with the SAP Business One application, which it has successfully maintained since 2006.

Valogix offers customers easy-to-use inventory planning solutions. The advanced technology solutions automatically forecast future demand, set optimal stocking levels, create replenishment

orders, and optimize inventory levels. Valogix Planner 6 has been proven to interoperate with SAP Business One via the SAP Business One software development kit (SAP Business One SDK) 2007. It is available in either on-premise or Software-as-a-Service (SaaS) models.

Using Valogix solutions in conjunction with SAP solutions includes dramatic inventory cost reductions, improved planning productivity, reduced stockouts, decreased expedited shipping costs, and increased customer satisfaction - providing a powerful return on investment.

“Before implementing Valogix Planner along with the SAP Business One application, we would spend eight hours a day, five days a week on our planning and purchasing procedures,” said Maurice Riley, Operations Manager at Camlab Ltd. in the U.K. “After implementation, we spend fewer than three hours a day and are confident that the numbers are spot on. We have increased our productivity by 30 hours a week, and by only ordering what we need, we’ve significantly reduced our excess stock while at the same time, increased service levels across all of our lines.”

SAP EcoHub is live at <http://ecohub.sap.com>. Visitors can search for solutions in many ways, including industry or solution, key words, relevance or partner. Solutions can be evaluated online based on feedback from other users, partners and business experts. Visitors can view an online demo on SAP EcoHub or request more information by requesting to be contacted, and initiate the purchase of the solution.
