

Experience the Value of Inventory Optimization

Valogix Uncovers the Cash Hidden in Your Inventory Investment

The Real Savings Story

Valogix solutions help you meet customer demand without over-investing. Immediately after installation, our built-in algorithms compare your current inventory item mix and capital investment to the Valogix recommended inventory investment. Excess and Inactive inventory are identified for your review along with all current Open Orders which could result in an even greater excess inventory. This information is displayed in an easy to use format and provides you with the ability to reduce the cash needed to meet customer demand.

In the screen shots from VALOGIX® Planner below, you can see the inventory reducing power of Valogix value-based inventory planning. The data represents companies in the Auto, Aviation, Distribution, and Medical markets.

	Current Inventory Investment in \$	VALOGIX Optimized Inventory \$	Company Service Goals
Inventory Investment Summary			
	Part Detail	Inventory	Aging
	On-Hand + On Order	Ideal Inventory	Target Service Level
Small inventory dollar value			
Total Value	362,746	167,396	
Essential Parts Value	362,746	167,396	100%
Non-Essential Parts Value			90%
Medium inventory dollar value			
Total Value	1,984,645	599,374	
Essential Parts Value	1,984,645	599,374	100%
Non-Essential Parts Value			90%
Large inventory dollar value			
Total Value	9,856,218	4,497,017	
Essential Parts Value	9,691,971	4,466,298	100%
Non-Essential Parts Value	164,247	30,719	90%
Very large inventory			
Total Value	78,172,687	68,635,395	
Essential Parts Value	73,375,045	61,990,471	100%
Non-Essential Parts Value	4,797,642	6,644,924	90%

Cost reductions above range from 13% to 70%

For more than 20 years, Valogix professionals have helped companies all over the world achieve similar results.

Solutions That Work

Valogix offers intelligent, dynamic, and proven solutions for inventory planning. Our suite of solutions forecast future demand, create a balanced, optimized inventory, set reorder points, and create new orders automatically. Valogix solutions offer the added benefit of providing the potential for positive cash flow within days of installation.

Our solutions optimize your inventory investment relative to your customer service goals, allowing you direct control in achieving the highest return on your investment. All of our solutions are scalable to handle inventories of all sizes.

Additional Time and Money Savings Benefits

Features:

- Simple, automated installation process — IT support not required.
- Automated interfaces make implementation to major business software solutions fast and easy.
- Dynamic interface software automates data processes, imports, and exports.
- Simple and easy to use. Work with only one or two screens to complete all work.
- Dynamic, alert driven system.
- Full-featured solution incorporates inventory optimization which automatically calculates the correct level of inventory investment.

Benefits:

- Saves time and money on valuable resources
- Eliminates manual duplicate data entry and saves time and money every time data is imported. Hassle-free, automatic data exchange is valuable in today's world of limited time and resources while focusing on satisfying the customer.
- Saves time and increases productivity.
- Dynamic and adaptive systems save time, effort and eliminate the worry of staying current with a changing business climate. Optimization dramatically lowers costs and helps to raise service levels. Customer satisfaction goes up and so do repeat sales.

The Bottom Line

We know you work hard everyday. You may have other software projects planned. You may think your inventory is under control, but can you be sure? Each day you are not using Valogix solutions, you are missing out on the opportunity to free up CASH. For example, based on an inventory value of \$1,000,000 and an average inventory reduction and productivity gains of approximately 31%, as much as \$310,000 in positive cash flow can be realized. Why wait? It doesn't get any easier or better than this.
