

VALOGIX[®] Inventory Planner V8 Edition

Work smarter. VALOGIX adapts all aspects of inventory management into one advanced, simple-to-use software product. The automated planning tools improve your competitive advantage by keeping costs low, so you can focus on customer service. VALOGIX's powerful, yet easy-to-use user interface allows any employee to understand the system, freeing up resources to do what you do best.

From a Valogix customer...

"We used to spend all day, every day creating orders by running multiple reports to avoid over and under purchasing. Since implementing VALOGIX, we create our orders in less than three hours."

"We have increased our productivity by 30 hours a week and by only ordering what we need, we've significantly reduced our excess stock while at the same time, increasing service levels across all of our lines."

Maurice Riley, CamLab Ltd., UK

Valogix Solutions:

Automate Inventory Planning Process

- Forecasting
- Replenishment planning—new orders, transfers, work orders
- Optimization—reduces costs and improves service

Are Easy to Use and Affordable

- Simple to use and highly effective
- Exception based—alerts warn of future issues
- The most optimization power for the money

Provide Visibility to All Items and Locations

- No second guessing where stock is or where stock is needed
- Planning Groups increase productivity and performance
- Key customers can be planned for better service

Install On Site or Access In the Cloud (Software-as-a-Service)

- Highly flexible architecture allows installation at your site, or
- Go to the Cloud for low cost Internet-based Planning (SaaS)

VALOGIX[®] ADAPT Planning Engine - the power behind the system

No more manual work to determine:

- Forecasts
- Replenishment orders
- Stocking levels
- Min & Max levels
- Safety Stock
- Transfers

Dynamic planning keeps you current:

- The system automatically adjusts as demand and conditions change
- Alerts warn you of potential problems before they happen
- Excess and Inactive inventory are immediately identified
- Get instant access to stock levels in all locations

Intelligent planning:

- Runs multiple forecasting models to select the right one for each item at each location
- Optimizes and re-balances mix to reduce costs and increase service
- Replenishes just the right amount of stock when it is needed and not before

Robust Planning and Innovation

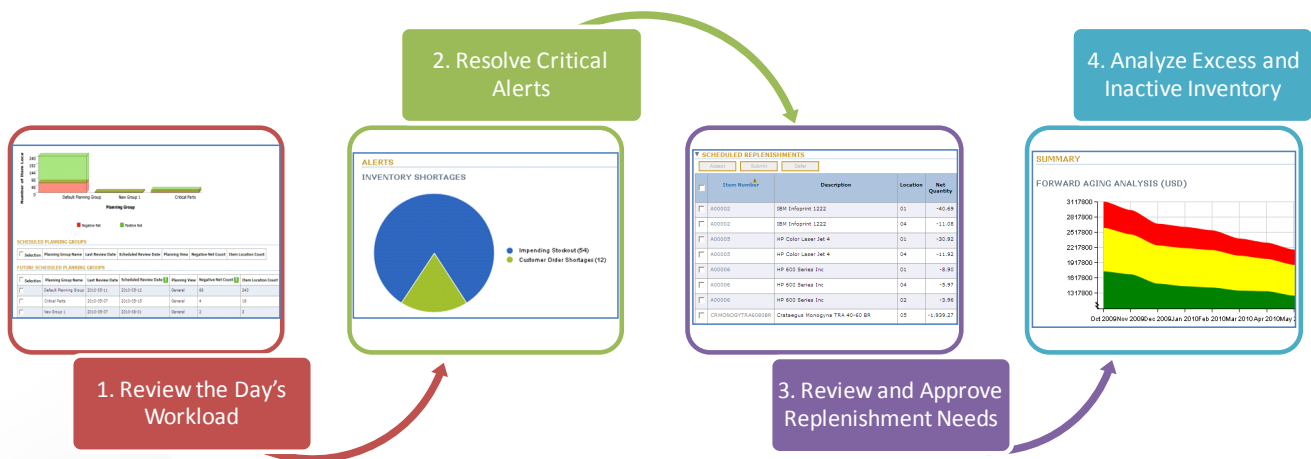

Valogix provides innovative planning solutions the way you want them:

- Virtual deployment provides a fast and stable implementation
- Installed on-site at your facility for local servers and users
- SaaS (Software-as-a-Service) from a Valogix authorized hosting partner

Built In Intelligence

- Automatic data synchronization with your business management system
- Business Intelligence (Analytics) information for strategic and longer range planning
- Export data directly to Excel for custom analysis and reporting
- Monthly Performance tracking shows progress against goals
- Dashboards provide key data at a glance and are linked directly to the details.

Defines Daily Workload Automatically

The new VALOGIX Planner is built on a robust architecture. All you need is a browser and you are ready to plan anytime, anyplace.

VALOGIX[®] Inventory Planner

True Inventory Optimization

One of the key capabilities is the ability to optimize your current and future inventory requirements. The program pin points inconsistencies and exceptions to the business requirements needing attention.

This information allows for corrective action to be taken to meet needs while minimizing inventory investment. Inventory reductions of over 20% or more are achievable. Optimization takes your planning capabilities to a new level of efficiency and cost savings automatically.

SUMMARY

	Actual Inventory	Ideal Inventory	Adjusted Ideal Inventory	Count
Valogix SQ	50,847.00	33,948,492.36	33,952,709.02	37

DR1	Colorado Downriver Racing Kayak	Western	Default Planning Group	Downriver Kayak	0.00	0.00

Automatic Replenishment Planning

VALOGIX Inventory Planner optimizes and recommends stock levels for all items at all stocking locations.

The system quickly identifies items that are or will be in short supply to meet demand on a scheduled basis. It produces a list of Items that have reached a review date and have a need to be replenished. It includes the ability to Buy, Make or Transfer items. In combination with alerts, scheduled replenishments elevate a planner's productivity to new levels.

Automated Forecasting

VALOGIX's proprietary forecasting gives you the forward visibility you need to manage your inventory for up to 36 months. The forecasting engine effectively handles slow, random demand and highly seasonal items, and indicates the model chosen.

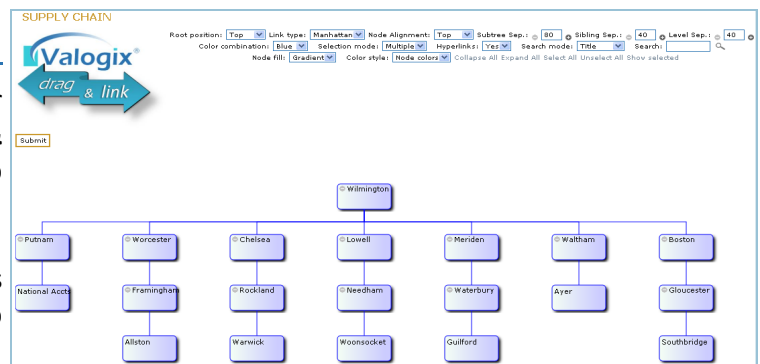

It is easy to make a manual change to the forecast. Just change the number in any month on screen and the system will automatically plan for the change while retaining the original value. Forecasting is one variable Valogix solutions use to generate the stocking quantity.

Internal Supply Chain Network

VALOGIX makes it easy for you to map and replenish your company stocking locations. The new VALOGIX[®] Drag & Link allows you to simply drag and link how you want to resupply each location.

This process automatically rolls up history and establishes the actual internal supply chain process that is used to replenish each location.

What are your inventory goals?

VALOGIX delivers ready to use solutions that are very easy to use, affordable, and provide you with a high rate of return. If you answer yes to any part of the following questions, VALOGIX can help.

What are your inventory goals and objectives? Do you want to:

- Reduce inventory by 20% or more?
- Reduce expedited and emergency shipments by 35% or more?
- Improve productivity by reducing planning time by 60% or more?
- Control and reduce replenishment spending by 15% or more?
- Improve customer satisfaction by having the right items available when your customers want them?
- Generate more sales and do cross-selling and up-selling?

Valogix Delivers Proven Superior Value

The chart below is a representation of the type of potential savings our customers achieve with VALOGIX solutions. In addition to productivity gains and cost reductions, our customers experience increased revenues from satisfying customers the first time every time.
